

SATO'S MOBILE
PRINTING SOLUTIONS

Print from wherever and whenever

Whether in the warehouse, in the field or at the customer's site, you can rely on the SATO Mobile Printing Solutions. Lightweight, ergonomic, wearable and able to withstand the challenges of field conditions where dust and temperature extremes, as well as physical shock are common, the SATO Mobile Printers help deliver Efficiency and Convenience without compromising on Performance.

RETAIL IN-STORE

Price & Promotion Labelling

The SATO Mobile Printing Solution enables the execution of various price changing strategies on demand right on the shop floor: promotional markdowns, clearance, seasonal sales, or product mix changes.

Shelf Labelling

The MB printers can be used to print one or multiple shelf labels at the point of application as required, avoiding waste and improving efficiency. Retailers can print labels on location while connected wirelessly to the host system to ensure the right coordinating between markdown prices on the shelf and payments recorded at the POS.

TRANSPORTATION & LOGISTICS

RECEIVING

Receiving Verification

Verifying deliveries received to record arrival, relabelling shipment and directing items to the right location require the flexibility of a mobile printing solution like SATO's Print delivery labels on demand and scan these labels throughout the process for tracking purposes.

ROUTE ACCOUNTING

Pickup and Delivery

The MB printers equip field delivery personnel with the capability to print on site proof-of-delivery labels or attempted delivery notices for packages, and process delivery payment transactions at the press of a button. You can rely on the SATO mobile solution to provide for cases of discrepancy between items ordered and delivery, which can be updated on site.

FIELD SERVICE APPLICATIONS

Mobile printing can be an important enabling technology for your business to improve field service productivity: confirming work orders, invoicing and payment processing on site, and printing reports, maintenance records, inspection seals, service reminders, and other documentation, which significantly reduce errors, save time and improve customer service.

HEALTHCARE APPLICATIONS

Specimen Labels

Hospital staff can print specimen labels at the point of collection or at the patient's bedside to ensure positive patient identification and specimen matching.

Patient Identification

The SATO MB printers integrate with various hospital information systems to offer mobile printing functionality that enable order entry automation, records management, medication management, specimen management, asset management, accounting and more.

Scan and print on demand with wireless printing technology

MANUFACTURING & WAREHOUSING APPLICATIONS

Pallet Labelling

When breaking into a pallet to remove a partial order, you can print label when needed, and to re-label the pallet in real-time to maintain inventory accuracy.

Forklift-Mounted Printing

The MB Series is ideally designed to accommodate accessories to be securely mounted on forklifts. Forklift operators can print product identification, bin, and shipping labels at the point of application without needing to go back to the administration office to pick up labels.

LAW ENFORCEMENT APPLICATIONS

Electronic Citations

Citations can be costly and error-prone: the electronic citation mobile printing solution can be used to replace handwritten tickets without needing to go back to the administration office to pick up labels.

FEATURES OF SATO MOBILE PRINTERS

- Wearable – worn at waist using waist belt clips or on shoulder using shoulder straps.
- Wireless Connection – support latest bluetooth and infrared technologies and enabled for wireless network connection to receive print jobs and other data from host systems. Support 802.11b/g wireless network standards. Support leading security protocols such as Pre-share key and others.
- Vehicle Mounted – designed to be mounted onto vehicles such as forklifts and delivery trucks. Mounting can be permanent for in-vehicle operation or removable so printer can be used to print at the point of service.
- Energy-efficient Power Management – battery optimized to handle full-shift operation and idle time.
- Industrial Versions Mobile Printers – ruggedized for high-usage, high-impact applications.
- Anti-bacterial Housing – ideal for food preparation, healthcare and clean room environments.
- Integrated Dispenser
- Easy Media Loading, Support Wide Range Of Media and Large Media Roll
- High Print Speed & Throughput
- High Resolution – up to 305dpi.

MOBILE PRINTING LINERLESS LABEL

The SATO linerless labels come without liners or backing papers, thus eliminate unnecessary paper wastage after printing. This is in line with SATO's corporate social responsibility in support of eco-friendly practices to conserve resources.
